Tan Binh, Ho Chi Minh

Education

Information Technology

2021 - 2025

Industrial University of Ho Chi Minh City

Focused on software engineering , object - oriented programming , data structures , and computer networks . Gained hands - on experience with game development projects using Unity and C # , along with team collaboration and version control tools like Git , SourceTree , ...

Skills

Programming & Technologies

- **C#**, **Java**, **HTML/CSS/JavaScript**
- **Version Control**: Git, GitHub, SourceTree, Fork,...
- **Unity 2D/3D** (gameplay, UI, animation, shaders)

Objective

Unity Game Developer & Playable Ads Developer with hands-on experience in building mobile games and interactive playables using Unity/C# and HTML5. Strong focus on core gameplay design, user experience, and performance optimization for user acquisition campaigns. Seeking opportunities to contribute to both game design and playable ad production in data-driven, creative teams.

Work experience

Mobile Playable Developer **Aug 2025 - Present**

Amanotes

- Develop **HTML5/Unity-based playable ads** and interactive prototypes for user acquisition, focusing on **high CTR/CVR** and smooth performance on mobile devices.
- Collaborate with creative producers and designers to **translate game concepts into short, engaging playable experiences**, balancing **tutorial, challenge, and reward**.
- Design and implement **gameplay loops, UI/UX flows, and micro-interactions** tailored for playable ads (onboarding, fail/retry flows, win moments).
- Build and maintain **internal Unity tools and frameworks** that standardize playable production (template projects, reusable components, automation scripts).
- Support other **playable developers** in debugging and integrating playables into platforms such as **Luna** and internal pipelines.
- Contribute to defining **processes, documentation, and rubrics** for the **Creative Playable Ads Developer** role to ensure consistent quality and fair evaluation.
- Experiment with **AI-assisted workflows** (debugging helpers, code generation, internal agents) to speed up production and reduce repetitive tasks.

Game Developer **Dec 2024 - Aug 2025**

MoPa Games

- Started as a Fresher and advanced to Junior Game Developer within two months.
- Developed and maintained 2D/3D game features using Unity and C#.
- Worked on gameplay systems, UI/UX, animation controllers, and event handling.
- Participated in game design discussions (core mechanics, difficulty balancing, level structure, player feedback).
- Optimized game performance and handled bug fixing across production cycles.

Playable Ads & Tools

- **Playable Ads Development** (Unity & HTML5)
- Optimization for **mobile web performance** (size, loading, responsiveness)
- Internal **Unity tooling**: templates, reusable components, automation
- Integration with **Luna** and internal playable pipelines

Game Design

- **Basic Game Design**: core loop, mechanics, pacing, feedback
- **Game Development Architectures** (State Machine, Object Pooling, MVC/MVVM patterns in Unity)
- **System Design for games**: progression, currency, difficulty curves
- **UI/UX for games & playables**: onboarding, hint systems, touch interaction, feel

Other

- English (reading & writing technical documents)
- Collaboration in small **cross-functional teams** (developer–designer–artist)

- Integrated advertising SDKs (Unity Ads, AdMob) and managed monetization logic.
- Served as the main developer in a 3-member team (1 designer, 1 artist), responsible for implementing core gameplay features and polishing user experience.
- Used version control tools (Git, GitHub, SourceTree) and task management platforms (Height).

Game Developer **January 2024 - Dec 2024**

EBIZWORLD

- Participated in developing mini games using Unity and C#.
- Worked on UI implementation, gameplay logic, and basic animation
- Used Git for version control and task tracking

Projects

Unity Developer **2025 - 2025**

Pizza Mania: Slice Sort

Sole developer (5K+ downloads): developed full gameplay system, UI/UX, Unity Ads, AdMob, IAP, Firebase integration, and handled publishing on Google Play.

Unity Developer **2025 - 2025**

Cat Bus Jam: Seat out

Contributor (10K+ downloads): supported event programming and implemented various UI/UX elements in collaboration with team members.

Unity Developer **2025 - 2025**

Goods Match: Sort n Ship

Contributor (5K+ downloads): supported event programming and implemented various UI/UX elements in collaboration with team members.
